

Can-Am Sets its Sights on Becoming a Global Electric Motorcycle Leader with Launch of Can-Am Pulse and Origin

August 19, 2024

Pre-Orders for Can-Am Pulse and Origin Models Open Now

The all-electric 2025 Can-Am Pulse and Origin motorcycles are as exciting to ride as they are beautiful to look at. ©BRP 2024

Valcourt, Quebec, August 20, 2024 – Can-Am, iconic brand of BRP Inc. (TSX:DOO; NASDAQ:DOOO), is energizing the motorcycle industry by announcing the availability of its highly-anticipated 2025 Can-Am Pulse and Can-Am Origin all-electric motorcycle lineup. Building on BRP's rich 80-year history of powersports innovation and excellence, Can-Am is changing the dynamic and opening the road to a new generation of riders and electric vehicle enthusiasts.

"Today, we are reclaiming our two-wheel heritage by bringing new excitement to the electric motorcycle industry," said José Boisjoli, President and CEO of BRP. "50 years ago, Can-Am celebrated many victories with its Track 'n Trail motorcycles, and we are bringing that pedigree back with a focus on modern electric power, connectivity and thrill. We intend to become a global leader in that space with true innovation designed to simplify the riding experience for new riders and introduce electric motorcycles to all."

The Can-Am Pulse and Origin models redefine the ride and awaken the energy in every rider, whether in the city or off the beaten path. Each is driven by an all-new Rotax E-Power power unit – BRP's proprietary electric technology – which delivers instant torque on demand, merging pulsating performance with style and sophistication.

A key feature of the Can-Am motorcycle lineup that sets it apart is an innovative liquid-cooled system, which includes the battery, charger, inverter, and motor. The system significantly limits battery degradation over time while simultaneously optimizing range and charge time. In fact, riders will experience quick and efficient charging each and every time and in any condition – from 20% to 80% in 50 minutes – using Level 2 charging at home or at automotive charging stations.

2025 Can-Am Pulse

The Can-Am Pulse is crafted for the energy of city life. An agile and nimble naked motorcycle designed for smart commuters and urban explorers, it features a massive 10.25-inch touchscreen display with Apple CarPlay, allowing riders to navigate with ease and stay connected to each ride with the BRP GO! App. It also has a unique feature, an Active ReGen system that provides enhanced control and smooth deceleration while giving more power back to the battery.

The Can-Am Pulse stands balanced with a low center of gravity and ride height, and presents a comfortable yet assertive riding position, maximizing agility in an active urban environment. Four riding modes – Normal, Sport+, ECO and Rain – allow it to adapt to different environments and rider preferences, while KYB suspension with 140mm of travel at the forks keep it planted with a sportier feel. The optional "Pulse 73" trim – a tribute to Can-Am's motorcycling past – adds LED lighting, LinQ gauge spoiler, and signature paint and badging.

2025 Can-Am Origin

The Can-Am Origin is engineered for adventure beyond city limits. It boasts the same Active ReGen and connective technology as the Pulse, and wields unmistakable Can-Am DNA and motocross heritage with all-terrain readiness, enhanced suspension, and dual sport tires. It adds an Off-Road riding mode, and its high ground clearance and full KYB suspension with 255mm of travel up front and adjustability in the rear inspire confidence off

the beaten path and firm planting on paved roadways. The Can-Am Origin offers six riding modes: Normal, Sport, ECO, Rain, Off-Road and Off-Road+.

Simply put, the adventure-packed Can-Am Origin brings new exhilaration to both the street and the trail with a modern, multi-terrain capability. An optional "Origin 73" trim adds LED lighting, LinQ windscreen, and signature paint and badging.

Both the Can-Am Pulse and Origin come standard with a durable 8.9 kWh battery that has been battle-tested in scorching desert heat and cold winter temperatures. The system powers the Can-Am Pulse to an estimated city range of up to 160 km (100 miles), and the Can-Am Origin to an estimated city range of up to 145 km (90 miles).

The Can-Am Pulse and Origin are built to be easy to use and easy to ride for new and seasoned riders alike. Without a standard clutch and transmission, riders can simply twist the throttle and instantly feel the acceleration and premium riding experience. Additionally, riders no longer have to walk their bike backward into position, as both of these new models feature a reverse function. Riders will also appreciate the near-silent and vibration-free experience, as well as the smooth and precise power delivery even in tight, low speed situations.

With more than 20 compatible LinQ Nano tool-free accessories for both the Can-Am Pulse and Origin models, there are multiple configurations for a wholly personalized ride experience.

Pre-orders for Can-Am Pulse and Can-Am Origin are now available at select BRP dealerships in France, Germany, Spain, UK, Italy, Belgium, the Netherlands, Norway, Sweden, Finland, Austria, the United States, and Canada. People can visit a Can-Am motorcycle dealership and order the model of their choice, with production starting in Q4 of 2024 and global deliveries starting in early 2025.

All Can-Am motorcycles globally are backed by an extensive vehicle and battery warranty. To learn more about the exciting new electric Can-Am motorcycles, including warranty information and current sales promotions, visit a local [Can-Am motorcycle dealer](#) or go to www.canammotorcycles.com.

About BRP

BRP Inc. is a global leader in the world of powersports products, propulsion systems and boats built on over 80 years of ingenuity and intensive consumer focus. Through its portfolio of industry-leading and distinctive brands featuring Ski-Doo and Lynx snowmobiles, Sea-Doo watercraft and pontoons, Can-Am on and off-road vehicles, Alumacraft and Quintrex boats, Manitou pontoons and Rotax marine propulsion systems as well as Rotax engines for karts and recreational aircraft, BRP unlocks exhilarating adventures and provides access to experiences across different playgrounds. The Company completes its lines of products with a dedicated parts, accessories and apparel portfolio to fully optimize the riding experience. Committed to growing responsibly, BRP is developing electric models for its existing product lines and exploring new low voltage and human assisted product categories. Headquartered in Quebec, Canada, BRP has annual sales of CA\$10.4 billion from over 130 countries and a global workforce of close to 20,000 driven, resourceful people.

Caution concerning forward-looking statements

Certain information included in this release, including, but not limited to, statements relating to the Company's intention to become a global electric motorcycle leader with the launch of the Can-Am Pulse and Origin motorcycles, the expected dates of production and global deliveries of such products, their respective features, the effect these products and their features are expected to have on the industry, on consumers and on the Company, and other statements that are not historical facts, are "forward-looking statements" within the meaning of Canadian and United States securities laws. Forward-looking statements are typically identified by the use of terminology such as "may", "will", "would", "should", "could", "expects", "forecasts", "plans", "intends", "trends", "indications", "anticipates", "believes", "estimates", "outlook", "predicts", "projects", "likely" or "potential" or the negative or other variations of these words or other comparable words or phrases. Forward looking statements, by their very nature, involve inherent risks and uncertainties and are based on several assumptions, both general and specific. The Company cautions that its assumptions may not materialize and that current economic conditions render such assumptions, although reasonable at the time they were made, subject to greater uncertainty. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors which may cause the actual results or performance of the Company to be materially different from the outlook or any future results or performance implied by such statements. Further details and descriptions of these and other factors are disclosed in the Company's Management's Discussion and Analysis for the fiscal year ended on January 31, 2024.
