

NEW CAN-AM MAVERICK SPORT SIDE-BY-SIDE VEHICLES BRING THRILLING PERFORMANCE TO 60-INCH TRAIL CLASS

April 3, 2018

- 60-in. (152.4 cm) width is ideal for performance trail riding
- Features much of the acclaimed innovation found across current Maverick lineup
- Continues BRP pledge to unveil a new Can-Am SSV every 6 months for 4 years

Valcourt, Quebec, April 3, 2018 – BRP (TSX:DOO) is expanding its lineup of advanced Can-Am side-by-side vehicles with the addition of two all-new Can-Am Maverick Sport packages. The new models deliver exhilarating performance in a 60-in. (152.4 cm) platform, ideal for people who want to explore trails with confidence.

The two new packages – a base and a DPS – feature cutting-edge design, performance-driven innovation, and award-winning Can-Am Maverick heritage. They are built from the ground-up to enhance the rider experience and provide confidence on the trails so people can focus more on creating lasting off-road memories with friends and family.

"The new Can-Am Maverick Sport is the best side-by-side vehicle we have ever developed for sporty trail riding," said Bernard Guy, Senior VP, Global Product Strategy. "With Can-Am ingenuity, awesome Rotax power and incredible handling and comfort, they're the perfect choice for people who want to tackle off-road adventures and challenges."

The base model Can-Am Maverick Sport features a 75hp 1000cc Rotax V-twin engine, while the DPS model is available with a 100hp version of the high-torque, high-performance motor. Both packages are calibrated for sport riding, with a focus on precision, stability, and traction.

The base model is available in white and the DPS package is available in Can-Am Red or Sunburst Yellow. There are nearly 150 accessories available so people can customize their Maverick Sport to fit their needs.

The Can-Am Maverick Sport will arrive at dealerships in June.
